

eezGøst

Hotel Management solution

eezGøst is a scalable, cloud base hotel management software created using the latest technologies. It automates all the critical daily operations of any hotel's front desk and back office.

USER FRIENDLY

EASY TO USE

EASY TO LEARN
& OPERATE

Our System provides the user with the features of reservations, occupancy rates, direct check-in, room management, etc. and many of these features are well customizable, so both small and large hotels can take advantage of this software. An automatic reporting and calculations system can help to save a great deal of time in terms of revenue generation.

Here at Indocosmo, we try to understand the requirements of our clients and this is why we can offer a complete, yet modular, software, to optimize the operations of individual or a chain of hotels.

Hotel Management System

A hotel is a hive of numerous operations such as front office, booking and reservation, security, Housekeeping, Facility management, CRM and more. All these activities take place simultaneously and difficulty of managing these diverse activities manually led to the development & introduction of Hotel management system with the following features.
